

CTO ALEXANDER POHL

“ My ambition is to empower the most talented people from different backgrounds to develop the very best automation software for electronics engineering. We as a team strive to deliver highest value to our customers, and I work every day to ensure our technology, processes and software quality is up to that. ”

Alexander Pohl is the CTO of Celus. He grew up in the municipality of Heldenstein in Bavaria. After finishing his school education at the Gymnasium Gars in 2010 he started studying **Aerospace Engineering at the Technical University Munich.**

In 2016 he graduated as a **Master of Science**. In parallel he also studied **Business at TUM**, with a focus on entrepreneurship. When his brother **Tobias Pohl** told him about the difference in software and hardware engineering, the idea of founding a startup quickly grew on them. After founding **Celus**, they were joined by the third founder, **André Alcalde**, and are now driving the revolution in electronics engineering.
